

# Portable Tables

## The Featherlite Massage Table

The Featherlite table, from just 10kg, is ideal for the mobile massage therapist! Now you will never have to struggle with that heavy massage table again. Our unique Lamiweb™ material is designed to withstand the weight of a small motorcar.

It can be used by any deep tissue therapist and handle up to 300kg working weight. Constant innovation led us to develop the Featherlite. Originally designed for the U.S. export market, we now sell them all over the world. Unlike most so-called lightweight tables we have not had to compromise on the Firm-n-Fold strength.

Standard features of this table are sewn corners and a Fixed Face Crest (there is no face hole in the table), or you can upgrade to the Face Crest Pro for less than half its normal price when you order it with your table.

The Featherlite Adjustable height table moves through 8 height variations from 66cm to 84cm. Available in three widths; slimline 63cm, standard 66cm and wide 73cm.

The Featherlite Fixed height table can be custom made to a height to suit you, anywhere from 61cm to 79cm and is available in two widths; slimline 63cm or standard 66cm.

**Options:** Face Crest Pro (upgrade), Armrest

**Accessories:** Storage Hammock, Carry Bag, Bolsters, Fitted Sheets

Length: 175cm + Face Crest 30cm - Total 205cm
